Full Stack Developer
Techcareer.net | Istanbul

Nov 2024 - Dec 2024

I worked as a Full Stack Developer. I actively developed with React and .Net core.

IOS Developer
AYM Yazılım

Aug 2023 - Sep 2023

I worked as an IOS Developer. I actively developed with Swift and SwiftUI. I took part in the development of an e-commerce platform's mobile application for IOS devices.

Projects

Blog Website Backend Project

In the blog site project I developed with .NET Core, I created a structure in accordance with the principles of layered architecture and Clean Architecture. I performed EF Core and database operations

TO-DO List Backend Project
Using TableView with Swift, an application containing fairy tales that children will read with fun has been realised.

Stock Management Backend Project
Back end project was made using .Net, which provides stock management in enterprises.

Currency Converter App with Swift

This IOS app enriched with various panels with Restful API the current exchange rate and provides the user with the exchange rate information retrieved from the internet.

Social Media Question Application with Swift

With Swift language, a social media application is realised where students can ask questions, answer questions, add notes, and search for resources.

Handicrafts with SwiftUI

Developed with SwiftUI, this application is an E-Commerce Mobile application that brings together people who sell handicraft products and users who want to buy these products. The data in this application is stored and used using Firebase.

Story Book App with Swift

Using TableView with Swift, an application containing fairy tales that children will read with fun has been realised.

Crazy Moles Game with Swift

This project called 'Crazy Moles' is written in Swift. The user earns points when clicking on randomly moving moles.
